

The COVID-19 infodemic has created a greater need for immediate access to reliable, verified 24/7 risk intelligence that tracks all regulatory changes from entry and exit requirements to internal restrictions on travel and movement.

Let's get your travel plans back on track

Our COVID-19 intelligence solutions are aimed to keep travel managers, travel consultants and travellers informed and prepared. With thousands of verification checks and over 400 policy updates each day, our COVID-19 data is 100% human verified, ensuring you have reliable information for planning and preparing to travel safely.

■ Widget

TravelCheck by Riskline, can easily be embedded into a website or platform with only a few lines of code. Organisations can customise the widget to their own brand colour, allowing for seamless integration. Navigation is user-friendly, delivering all the vital COVID-19 travel risk information that travel managers, travel agents or travellers need in a concise format. TravelCheck displays up to date risk and infection scores, at-a-glance information on travel destinations and need-to-know information on departure and arrival, as well as the COVID-19 policies of 75+ major airlines.

■ Publicly available tools

Our publicly available interactive maps quickly communicate COVID-19 infection and travel restriction intelligence; country maps for selected countries show detail down to the state or province level and mapping whether domestic travel and business activity is possible or not.

■ Microsite

Give your travel, security and HR managers a dedicated hub to review all current COVID-19 travel restrictions and measures. From international and regional travel impact and infection maps, to country reports with the latest COVID-19 Alerts and airline supplier policy data, Riskline's COVID-19 Microsite is your one-stop-shop for all travel regulations and restrictions.

■ COVID-19 API

Riskline's COVID-19 API delivers structured data and detailed intelligence from entry and exit requirements to testing and vaccination rules. The data is highly structured and covers 220+ countries and territories and also at the administrative level 1 for Canada, France, Spain, Australia and the United States. Our COVID-19 API, available in multiple languages, is refreshed and updated in real-time, 24/7.
