Alerts

Riskline Alert messaging operates 24/7/365

The screenshot displays a 'Global Map' interface with a sidebar on the left listing alerts for Spain, Haiti, Chile, Iraq, and St. Lucia. The main map shows risk levels across the world, with a 'U.S. State' icon over North America. Overlaid on the map are three alert cards for Mali, Pakistan, and Argentina. The Argentina card is the most prominent, showing a 'Moderate Risk' level and an alert about a Women's Day march in Buenos Aires.

Country	Risk Level	Alert Description	Time
Mali	High Risk		
Pakistan	High Risk		
Argentina	Moderate Risk	International Women's Day march planned in Buenos Aires	10 minutes ago

Travellers are safer when they are informed of the latest developments

Each alert contains essential intelligence, practical advice and precise geographic data about risks to traveller safety or impacts on traveller plans. When we are able to get advanced warning, notices are also issued for events happening in the future.

Alerts

Use Cases

During a breaking incident, finding accurate information can be difficult. However our alerts keep travellers in the know, helping them stay safe and informed when something happens.

Precise location data means our alerts can be integrated with tracking solutions to ensure managers are given relevant information about what's happening where employees are located.

Our alerts can also help assistance providers prepare for operations by providing them with the latest information on the ground.

Advisories

People make better decisions when they are informed

Riskline's Travel Advisories are detailed assessments of ongoing security situations and travel issues

We publish reports for high-risk geographic areas, political and security crises, persisting travel disruptions and major upcoming events like elections and international sporting competitions.

Advisories

Use Cases

Advisories can be used before a trip to learn more about ongoing and evolving situations, allowing travellers to suitably prepare for a destination's risks.

Travel managers can learn more about complex local developments, high-risk locations and upcoming events with our advisories. Longer and more in-depth than alerts, these reports keep managers informed and help them assess risk.

COVID-19 Data

Helping travellers manage COVID-19 disruptions

In-depth COVID Information

Riskline has closely tracked developments associated with COVID-19 since late 2019, communicating real-time intelligence about the pandemic to travellers via Alert messages, API, a dedicated COVID-19 microsite and the TravelCheck widget. Riskline's COVID-19 information ranges from the city to the national level.

COVID-19 Data

Use Cases

Our continuously-updated COVID-19 data clearly and concisely lays out all the information that travellers need to know before and during their trips to navigate all restrictions and health risks.

This data can help keep insurance companies and assistance providers keep their employees and customers informed of the latest travel restriction changes and assess the COVID-19 risks of a destination.

Destination Risk Reports

In-depth risk assessments

Detailed assessments for
225+ countries and territories

Get in-depth risk intelligence for your destination. For insurers, this information can be used by underwriters to assess country and regional risks. Security managers can use this information to advise their clients and provide risk analysis. Assessing our Destination Risk Reports can also inform managers decisions regarding trip approval and planning.

Destination Risk Reports

Our destination risk assessments are available in three levels of detail to suit your information needs.

01 Risk Level

The Destination Risk Level presents the overall Risk Level (1 through 5) for over 225 countries and territories.

We use five standardised risk levels to assess risk to personnel, travel and operations across all our reports. Each risk level is assessed based on an actual or potential impact and the likelihood of an incident occurring, if it has yet to take place.

02 Summaries

Riskline summaries give a concise overview of the security and travel safety situation for any destination.

It includes a country risk level and an overview of the political, terrorism, conflict, unrest, crime, natural hazards, health and local situation.

03 Destination Report

Riskline has Destination Risk Assessments for more than 225 countries and territories around the world.

Each report expands on the Destination Summary and contains highly in-depth intelligence pertaining to security information and risks on the ground, as well as a risk level that can be integrated into travel policies and business operations.

City Safe Reports

Know more about where you actually go

The screenshot displays the City Safe Reports web application. The interface is clean and modern, with a dark sidebar on the left containing navigation options like 'Dashboard', 'Global Map', 'Destinations', 'Covid-19', 'Daily Brief', 'Email Alerts', 'Content Updates', and 'Local Risk Level'. The main content area is titled 'United States of America' and shows a 'High Risk' status. Below this, there are tabs for 'RISKLINE', 'REPORT', 'MAP', 'ALERTS', 'ADVISORIES', 'CITIES', and 'SPECIAL REPORT'. The 'CITIES' tab is active, showing a list of available reports for various cities. The 'New York' report is selected, displaying an overall risk level of '1 Low' and a COVID-19 risk level of '3 Medium'. The report text states: 'The counties comprising the New York City metro area (Bronx, Dutchess, Kings, Nassau, New York, Orange, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester) report falling numbers of COVID-19 cases through the beginning of March. Staff shortages have led to periodic shutdowns of multiple New York City Subway lines.' Below the text is a map of the New York City area with green overlays indicating specific locations. The map includes labels for various neighborhoods and landmarks, and a 'mapbox' logo is visible in the bottom left corner of the map area.

We assess the safety of more than 250 global cities

Each city is assigned with a clear Risk Level. In addition to city-specific threats and other local knowledge, every report has a map of important locations down to street level.

Portal

Access to all Riskline content on any device

All our services and reports in one place

Riskline offers customised web portals that can be accessed from any device using any operating system.

Every portal features easy access to country and city reports, the global risk map and the alerts dashboard for use in operations centres.

Portal

01 Reseller Tools

The reseller version of our portal features useful tools for managing access for client companies. Resellers can create new company portals, manage their users and restrict their access to certain countries.

The reseller portal can be used to configure email alerts – create new subscriptions, allow user sign-up to alerts and notify users of risk level changes. Resellers can also enable the daily brief for company admins and travellers and select which edition they will receive.

In the admin version of the portal, admin users have access to more features and greater customisation. This includes custom logo, company tab, customisable text boxes, settings of risk level displays and direct access to Riskline reports.

From the first steps in our collaboration, Riskline has demonstrated to have an innovative mindset and true reactivity to provide the most updated and the most relevant information to our customers.

Travel Planet

COVID-19 Microsite

A dedicated hub for all our COVID-19 information

COVID-19 travel information in depth

Discover all the latest current COVID-19 travel restrictions and measures. From international and regional travel impact and infection maps, to country reports with the latest COVID-19 Alerts and airline supplier policy data, Riskline's COVID-19 microsite is your one-stop-shop for all travel regulations and restrictions.

Pre-Travel Advisories

Get prepared before you travel

Exactly what a traveller needs
to know before their trip

Sourced from our reports and travel intelligence, pre-travel advisories give travellers a concise overview of security risks and recent developments prior to reaching their destination. Ensure travellers are informed and prepared before they depart.

TravelCheck Widget

COVID-19 travel advice at your fingertips

Don't let COVID-19 confusion
get in the way of your
customers' decisions

TravelCheck by Riskline, can easily be embedded into a website or platform with only a few lines of code.

Organisations can customise the widget to their own brand colour, allowing for seamless integration. Navigation is user-friendly, delivering all the vital COVID-19 travel risk information that travel managers, travel agents or travellers need in a concise format.

TravelCheck Widget

Use Cases

TravelCheck displays up to date risk and infection scores, at-a glance information on travel destinations and need-to-know information on departure and arrival, as well as the COVID-19 policies of 75+ major airlines.
